SHOPFLOOR DATA CAPTURE

Information is the life blood of business today. It is the key to enhanced efficiency, quality, customer service and profitability through proper control of people, machines, operations and jobs. This information must be accurate, reliable, real time and immediately available to whoever needs it.

Feedback Data's automated data collection technology makes this possible. It is simple to use and install, has the flexibility to meet your individual needs and will justify the capital outlay with a rapid payback time.

Feedback Data terminals collect data wherever it is generated in any industrial, commercial or retail environment. Entering data is easy so operators can do it themselves as part of their job. The terminals provide information promptly to both managers and operators, therefore precisely directing their activities.

Available with bar-code, magstripe proximity and Dallas i-button® readers, the Kestrel terminal is simple to use, install and implement. Various connectivity options are available. It can be inserted directly into an Ethernet network. Alternatively, the terminal can link to a host computer through RS232 or RS485 communications interface.

KEY BENEFITS FROM FEEDBACK ELECTRONIC DATA CAPTURE

- Accurate, reliable information
- None of the errors of paper record keeping
- Information is live and available immediately
- Reduces retrospective problem investigation
- Operators get immediate feedback at their place of work
- Optimum utilisation of resources: human and machine

NUMBER ONE IN DATA CAPTURE

FEEDBACK KESTREL TERMINALS

FEEDBACK DATA NUMBER ONE IN DATA CAPTURE

Feedback Data is the UK's largest manufacturer of fixed Data Capture terminals.

Feedback Data's after sales service is provided through office and field-based engineers who carry out maintenance on a formal contractual basis and through ad-hoc repair visits. Feedback Data supports its software partners and their customers with comprehensive training, and by offering a range of services and software utilities that fully integrate the company's products into a total solution.

Feedback Data GmbH is the European subsidiary of Feedback Data. Based in Germany, the company provides a complete sales and support service to its European partners and customers.
