

FEEDBACK RUGGED TERMINALS

SHOPFLOOR DATA CAPTURE

TIME AND ATTENDANCE

JOB RECORDING

MATERIALS TRACKING

All businesses require timely and accurate information. With this they can respond to opportunities, monitor costs and control overheads, realise efficiencies and improve customer service.

Feedback Data's Rugged series of heavy duty Data Capture terminals automate the collection of relevant information in any industrial workplace where dirty and dusty conditions exist. Built with a cast aluminium case, the terminals are tough and strong and designed to provide reliable service in the most hostile environments.

Available with barcode, magstripe or proximity readers, the Rugged series is simple to use, install and implement.

Various connectivity options are available. The terminal can be inserted directly into an existing Ethernet or Token Ring network or linked to a host computer through RS232 or RS485 communications interface.

KEY BENEFITS FROM FEEDBACK DATA CAPTURE

- Accurate, reliable information
- Information is live and immediately available
- Large, clear display gives employees feedback at their place of work
- Fast payback from modest investment
- Completes the integration of the workplace with the computer network

FEEDBACK DATA NUMBER ONE IN DATA CAPTURE

Feedback Data is the UK's largest manufacturer of fixed Data Capture terminals.

Feedback Data's after sales service is provided through office and field-based engineers who carry out maintenance on a formal contractual basis and through ad-hoc repair visits. Feedback Data supports its software partners and their customers with comprehensive training, and by offering a range of services and software utilities that fully integrate the company's products into a total solution.

Feedback Data GmbH is the European subsidiary of Feedback Data. Based in Germany, the company provides a complete sales and support service to its European partners and customers.
